Assistant Professor in Psychology (Quantitative Methods)

The Department of Psychology and the Institute for Quantitative Theory and Methods at Emory University invite applications for a tenure-track Assistant Professor in Psychology with a specialization in quantitative methods to begin fall 2016. We seek an exceptional, active researcher with an independent research program who ideally will align with one or more of our three graduate programs in Clinical, Cognition and Development, and Neuroscience and Animal Behavior. A strong commitment to quality teaching is required, as the successful applicant will be expected to have experience in and be ready to teach courses in quantitative and statistical methods at both the undergraduate and graduate levels. A Ph.D. is required and post-doctoral experience is desirable. To apply, please go to Assistant Professor Position to create a profile which shall include a cover letter, CV, research statement, teaching statement, and reprints. Three letters of recommendation are also required and should be emailed to Emory_QuantPsyc_Search@emory.edu or mailed to: Chair, Psychology and Quantitative Methods Search Committee, Department of Psychology, Emory University, Atlanta, GA 30322. Review of applications will begin October 1, 2015. Applications received up to 30 days after October 1 will be given full consideration. Emory University is an Equal Opportunity/Affirmative Action/Disability/Veteran employer. Women, minorities, persons with disabilities and veterans are strongly encouraged to apply.
