Emory Psychology Graduate Program

Faculty mentors considering applications for the Fall 2026 Admission Cycle

Note: Some faculty are affiliated with more than one concentration area. Faculty who are considering applications may be open to co-mentoring with faculty who are not listed as considering applications for the Fall 2026 Admission Cycle. If you have a particular co-mentoring team in mind or want to consider the idea of being co-mentored, be sure to email your potential primary mentor (someone considering applications in your chosen primary concentration area) and explore the idea with them. Please click on the names of each faculty member to learn more about their concentrations.
